

# EASY PEASY SCIENCE FAIR & LABS

Dear Education Specialist,

**Please consider adding Easy Peasy Science Fair & Labs to our curriculum resource list.** I am interested in purchasing curriculum from this vendor as soon as possible. More information on Easy Peasy Science Fair and Labs ([Easypeasysciencefair.com](http://Easypeasysciencefair.com)) follows below.

Easy Peasy Science Fair sells curriculum, science kits and science equipment.

- 😊 **Science Project Kits:** These are developed and designed for the home environment. Each project kit contains curriculum that teaches specific scientific topics and then guides students through a hands-on experiment. Students are taught to collect and analyze their data and to then write papers. **A resource and pacing guide is provided with each kit for homeschool families.** This guide also contains suggestions for using these kits with different age levels.
- 😊 **Science Curriculum:** The Ooey Goey Chemistry curriculum is written specifically for homeschooling families with 5-8<sup>th</sup> grade students. It is carefully designed to walk students through basic chemistry as they try their hand at interesting labs and lessons.
- 😊 **Science Equipment:** From microscopes, to coding robots and graduated cylinders. Easy Peasy sells equipment that helps homeschooling families to incorporate STEM into their homes.

Easy Peasy Science Fair has been featured in homeschool blogs and magazines such as the Old Schoolhouse Magazine. The company provides curriculum to charter schools across the nation.

Thank you for your consideration in this matter. Please contact Easy Peasy Science Fair vendor relations at [contact@easypeasysciencefair.com](mailto:contact@easypeasysciencefair.com) to begin the enrollment process.

Sincerely,
